In the "Book Manager: Edit book" page the image is diplayed correctly. So the path is well formed there.

```
▼<div class="span3">
  ▼<div class="control-group">
      <img class="img-polaroid hidden-phone" src="http://localhost/cms_j_odd/images/Buchdatenbank/Coverbilder/0815.jpg"></img>
    </div>
  ▶<div class="control-group"></div>
```

There's a column called Cover where there should be a preview of the bookcover i guess

```
▶<td class="center hidden-phone"></td>
▶<td class="center"></td>
▼<td>
    <img class="img-polaroid hasTip" border="0" alt="" style="max-height:80px;min-width:24px;" src="/images/Buchdatenbank/Coverbilder/0815.jpg" title=""></img>
  </td>
▼<td class="has-context nowrap">
```
